Excel (VBA/Macros)
Adobe Photoshop

projects

DropChat Mobile App Front end git.io/vrsPj

Developed front end technology for location based chatroom app. Users can create chat rooms by zooming in and out of the map view to specify its radius and set other chat room details.

HTML5/CSS3, Javascript (JQuery, Ionic), Photoshop

Financial Calculator git.io/vrsXH

Built calculators into a spreadsheet to perform complex computations. Designed a minimalistic UI for ease of use. Some calculators include: depreciation schedule creator, Black-Scholes pricing

Excel VBA, Macros

Stock Watch App git.io/vrVDU

Implemented a software that pulls real time market data from Yahoo Finance. Users can add stocks to their personalized watch list. Quotes are automatically updated so no manual reloading of data necessary. Search box features an autocomplete function that provides suggestions as the user types their quote.

HTML5/CSS3 (Sass, Skeleton), Javascript (JQuery, JSON), YQL

Personal Site pialeung.me

Implemented a site with custom styles and animations to showcase my work. Created my own Bootstrap template and utilized the grid system to develop a responsive site. Interactive designs are all custom made. Head over to explore and experience my projects first-hand!

HTML5 /CSS3 (Bootstrap), Javascript (JQuery)
