education

Candidate for Bachelor of Accounting and Financial Management
University of Waterloo, Class of 2018

DropChat Mobile App UI git.io/vrsPj

Developed front end technology for robust app used to ease communication barriers between users within a specified area. Users can create chat rooms by zooming in and out of the map view to specify its radius and set other chat room details.
Technology: HTML5/ CSS3/ Javascript

Financial Calculator https://git.io/vrsXH

Created a calculator simulation environment in Excel. Built calculators into the spreadsheet to perform complex computations. Designed a minimalistic UI for ease of use.
Technology: Excel VBA/Macros

Project Delivery Officer at CGI

Developed in-depth spreadsheets using nested functions, including VLOOKUP, to suit project needs. Refined financial analysis skills by forecasting and evaluating the project budget and delta. Prepared financial reports for executive meetings.

CSS3 Projects

Explore my designs and animations over at my codepen account or in the portfolio section of my personal site.
Codepen: codepen.io/misspia
Personal Site: www.pialeung.me

Property Accountant at Venterra Realty

Honed prioritization skills through completion of financial statements to meet reporting deadlines. Displayed strong teamwork via collaboration with other divisions to compile investor audit requests. Reviewed and analyzed expense reports, investigating unusual deviations.

CER Hypothesis Testing AFM 323

Construction of confidence intervals, VaR's, descriptive statistics and rolling forecasts to determine a three security GMV and tangency portfolio. Created graphical presentations using Excel, Analysis Toolpak and Solver.
